

# CARFOLIA®

## INTERNATIONAL

A turning point in the life of your car: the day you have it fully coated with **CARFOLIA®**

**CARFOLIA** is the name given to the technique used for fully coating cars with high-performance colour film. Fully coated: that means the film is perfectly moulded to the shape of the bodywork. Every curve, every nook and cranny is carefully covered - without any unsightly cutting edges.

**CARFOLIA** lets you choose the colour that's right for you from an assortment of over 20 shades. And in most cases your newly coated car can be ready for pickup in just one working day.

**CARFOLIA** gives you total choice of colour when purchasing your company car. No need to pay a fortune for that eye-catching custom paint-job that in the end will just limit your car's resale value. Simply order your company cars in neutral colours that have good resale potential, and we'll apply the film coating in the colour of your choice.

**CARFOLIA** also protects your paintwork from scratches, chipping and UV radiation. Forget about those expensive paintwork touch-up jobs. And when the car's time on your fleet is up, it only takes a few hours to restore it to its original state.

**The ultimate in protection for your new car:**

### **CARFOLIA® transparent**

With its depth effect, this totally see-thru transparent coating brings out the brilliance in your car's paintwork. Produces especially goods results on metallic paintwork and is the ultimate in protection against scratches, chipping, car-wash streaking, vandalism, UV rays and much much more.

**When you're looking for an eye-catching colour design for your vehicle:**

### **CARFOLIA® DESIGN**

is a special service provided by **CARFOLIA**. We'll create a totally original, multi-colour film coating and provide for your total car lettering and marking needs - based on your design or our own. We can make your car stand out from the rest. Simply contact our Graphics department.
